Art Unit: 3662

1. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 1 is indefinite and unclear in that it is unclear how the term "settings" on line 13 of the claim relates to the rest of the claimed subject matter and in that the text of lines 13-18 of the claim make no logical sense in context. What the "settings" applied to?

Independent claim 6 is unclear in that the text of lines 13-19 of independent claim 6 make no logical sense in the context of independent claim 6.

2. Due to the lack of clarity of the two independent claims (i.e., claims 1 and 6), it has not been possible to interpret the claims so as to make a meaningful application of prior art to the claims. It is noted that lines 1-12 of independent claim 1 and lines 1-12 of independent claim 6 recite very conventional structure for measurement of any distance with a reflected wave (e.g, time delay reflectometry).
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The examiner-cited prior art is of general interest in relating to prior art radar systems that measure distance by the time of propagation.
